## Organizing Committee:

*Dr. Henrik Falconer*                      *Karolinska University hospital*

## Organization of the course:

The course will be built around multiple video sessions about the different applications of *da Vinci*<sup>®</sup> surgery in gynecology.

The aim of the course is to give tips and tricks for each different surgical step through videos: port placement, utilization of the different instruments, management of complex cases, and management of intra-operative complication.

To develop the interactivity of the course, it will be limited to maximum 40 participants.

## Morning: Oncology Session

- Modern surgical treatment of endometrial cancer
- Lymphadenectomy in endometrial cancer
- Surgical control in advanced cases
- Improvement of OR Efficiency and surgeon case load

## Afternoon: Complex Benign Surgery

- Myomectomy
- Role of robotics in endometriosis
- Robotic surgery in congenital anomalies of the uterus and vagina
