JOINT POSITION STATEMENT OF SUPPORT FOR UKRAINE

3 March, 2022

In Ukraine innocent civilians, among them neonates, children, adolescents and women, are attacked now brutally and their life is in danger. We therefore call EBCOG to send the following clear message to the world.

1. EBCOG condemns all military action against civilians.
2. EBCOG calls WHO, UN, and FIGO to ask together to stop war in Ukraine immediately.
3. EBCOG asks all its national delegates and council members, including Russia, Belorussia to unite this call.

In current indescribable military actions by the Russia and Belarus in democratic Ukraine, we suggest to consider discontinuing any professional or educational collaboration with Russia and Belarus in national level. We also ask EBCOG as an organization to take concrete steps to help colleagues in Ukrainian hospitals to continue their work in delivery departments, neonatal units, and departments of gynecology.

Prof. Oskari Heikinheimo
President, Nordic Federation of Societies of Obstetrics and Gynecology
EBCOG Council member

Prof. Hannele Laivuori
President of The Finnish Society of Obstetrics and Gynaecology

Prof. Helle Karro
